Case Study – Recovering \$21.4M+ in Hidden Revenue

\$21.4M+

Revenue Recovered

4 Pillars

of Analysis

370% ROI

Market Expansion

77.3%

On-Time Delivery

Project Overview

Four interconnected analysis streams uncovering \$21.4M+ in hidden value

Shipping & Logistics

\$10.6M at Risk

54.8% of cancellations caused by shipping delays. First Class failure rate: 95.2%

Customers & Markets

\$4M+ New Revenue

Discounts show zero elasticity. Growth engine = customer acquisition, not discounts.

Product Lifecycle

S-Curve Gap Crisis

9 products drove 94.7% of sales then crashed. Late discovery cost 28% revenue drop.

Sales & Payments

\$10.8M Frozen

95.3% of payment orders frozen/pending. 8.2% fraud rate in transfer channel.

Shipping Crisis

\$10.6M at Risk from Delivery Failures

- 54.8% of cancelled orders caused by shipping delays
- First Class shipping: 95.2% delay rate — near-total failure
- Root cause: Supplier preparation delays, not transit
- Uniform delay across regions → warehouse-level systemic issue

Current On-Time Rate

45.2%

of orders delivered on time

Top Delayed Categories

Golf Shoes 68.6% · Cameras 62.2% · Pet Supplies 61.4% · Men's Clothing 61.1%

Shipping Solution & Results

From 45.2% to 77.3% on-time delivery — \$10.6M secured

BEFORE

45.2%

on-time delivery

AFTER

77.3%

on-time delivery

\$10.6M

secured from
cancellation risk

Buffer Day System

Add 1-day buffer to delivery promises for suppliers with >60% delay rate

Late Risk Dashboard

Real-time monitoring alerts operations team before delays occur

SLA Enforcement

Fines & blacklisting for suppliers failing to prepare orders within 24 hours

Priority Handling

First Class shipments prepared in first half of day to allow delivery time

Proactive Compensation

Auto 10% discount code sent to customers when supplier delay detected

50% Returns Reduced

50% reduction in return requests in critical product categories

Customers & Markets

The Acquisition Bottleneck — We sell well to those we reach, but don't reach everyone

0

Price Elasticity

Customers buy same quantity
whether discount is 1% or 25%

\$554

Avg Spend / Customer

Purchasing power is virtually
identical across all global markets

=

Identical Preferences

Consumer, Corporate & Home Office
all share same product preferences

Key Insight:

The ONLY differentiator between markets is Customer Acquisition (reach). Discounts are wasted spend.

Market Expansion Strategy

Redirect \$1.1M from ineffective discounts → Customer Acquisition for 370% ROI

\$1.1M

Discount savings
reallocated

+7,300

New customers in
emerging markets

\$4M+

New revenue
generated

370%

Return on
investment

- 1 Cap Discounts at 5%** — Zero elasticity proved — no revenue lost. Savings fund growth campaigns.
- 2 Reallocate Capital** — 50% of discount savings (\$1.1M) directed to customer acquisition campaigns.
- 3 Clone Success Model** — Replicate LATAM acquisition channels in low-activity emerging markets.
- 4 Unify Marketing** — Single campaign for all customer segments — same preferences, less spend.

Product Strategy

The Fatal S-Curve Gap — \$32.4M concentrated in 9 products that crashed to zero

94.7%

Sales from 9 products

\$32.4M

of \$34.2M total sales

2 months

to crash to zero

28%

Revenue drop — 5 months

Dell Laptop Discovery

Discovered late but still generated \$2.625M in just 2 months — starting higher than any prior best-seller. What if found 5 months earlier?

Product Lifecycle Solution

Invest 5% of capital in continuous R&D — Prevent existential revenue gaps

Dead Stock

Perfect Rip Deck

\$4.4M historic, idle 121+ days

Action: Stop supply. Run clearance sales. Free warehouse space.

Short-Life Stars

Dell Laptop, Web Camera

\$595K in 2 months at 221 units/mo

Action: JIT purchasing: immediate supply, no long-term storage. Ride the curve peak.

Rising Leaders

*Fighting Video Games, Smart
Watches*

357–838 units/mo, 0 idle days

Action: Secure large inventory NOW. These are at peak demand — maximize while curve rises.

The 5% Rule:

Allocate 5% of capital for continuous R&D during the S-Curve growth phase — not after the crash.

Conservative: Prevent 28% revenue drop · Optimistic: Discover next Dell Laptop early → multiply revenues

Sales & Payments

\$10.8M Frozen Between Ineffective Discounts, Fraud & Locked Transactions

PAYMENT (23.1%)

95.3% of orders frozen or pending

\$7.2M locked

TRANSFER (27.8%)

8.2% fraud rate + 7.5% manual cancellations

\$1.4M/year lost

DISCOUNTS

Customers buy same quantity at 1% or 25% discount

\$2.2M wasted margin

Total Recoverable:

across discounts, frozen payments & fraud

\$10.8M

Payment Recovery Plan

Immediate actions to unlock \$10.8M and prevent future losses

Fix Payment Gateway

Within 48 hours

Repair the gateway causing 95.3% order freeze OR reroute traffic to Debit channel immediately.

\$7.2M

liquidated immediately

Cap Discounts at 5%

Immediate

Zero elasticity confirmed — sales volume unchanged at any discount level. Extra margin is pure waste.

\$2.2M

recovered as net profit

Automate Transfer System

Short-term

2-hour auto-cancel on pending transfers. This eliminates 8.2% fraud & 7.5% manual cancellation losses.

\$1.4M

fraud prevented annually

Push Debit to 60% Share

Ongoing

Debit: 85.7% success, zero fraud. Incentivize with 3% discount or free shipping. Cuts review effort by 50%.

50%

less manual review effort

Final Impact

Total Financial Impact Identified: \$21.4M+

Frozen Payments

\$7.2M

liquidated immediately from payment gateway fix

Shipping Cancellations

\$10.6M

in sales secured from cancellation risk

Discount Optimization

\$2.2M

recovered into net profit by capping at 5%

Fraud Prevention

\$1.4M

in annual fraud losses prevented via automation

Market Expansion

\$4M+

new revenue from customer acquisition (370% ROI)

TOTAL IMPACT

\$21.4M+

"Our problem was not shipping itself, but the gap between what we promise and what we deliver. The cure starts with making our promises honest, then improving our speed gradually."
